

Proceedings ICPHS 95 Stockholm

Vol 2 Tuesday 15 Aug

**Proceedings of
The XIIIth International Congress
of Phonetic Sciences**

ICPhS 95

**Stockholm, Sweden
13 - 19 August, 1995**

**Editors
Kjell Elenius & Peter Branderud**

Volume 2 of 4

The XIIIth International Congress of Phonetic Sciences (ICPhS 95) has been organised by the Department of Speech Communication and Music Acoustics, KTH (Royal Institute of Technology), and the Department of Linguistics, Stockholm University.

Printed by Arne Sjöström's Grafiska
Stockholm 1995

STATISTICS FOR THE ICPHs 95 PROCEEDINGS

Number of sessions and contributions

Sessions	Contributions
3 Plenaries	11
18 Symposia	63
18 Poster Sessions	262
54 Oral Presentations	262
93 Total	598

Number of contributions from different countries and author statistics

We only have the addresses of the contact persons for each paper in our database. The statistics are based on these addresses. This gives us 42 different countries for the 598 papers. Some papers have authors from different countries.

115	United States	2	Croatia
82	France	2	Estonia
72	United Kingdom	2	Greece
54	Germany	2	India
49	Netherlands	2	Israel
46	Sweden	2	Poland
23	Canada	2	Republic of South Africa
23	Japan	2	Taiwan
15	Italy	1	Austria
14	Finland	1	Belarus
13	Republic of Russia	1	Czech Republic
10	Spain	1	Hong Kong
9	Belgium	1	Hungary
8	Switzerland	1	Iceland
7	Australia	1	Latvia
6	Brazil	1	New Zealand
6	Norway	1	Portugal
5	Peoples Republic of China	1	Republic of Korea
4	Denmark	1	Singapore
4	Ireland	1	Slovenia
4	Ukrainian SSR	1	Thailand

The total number of authors is 1255. The number of different authors is 934.

	number of authors per paper									
authors	1	2	3	4	5	6	7	11	13	
papers	251	181	90	43	19	7	4	2	1	

	number of papers per author						
papers	1	2	3	4	5	6	7
authors	710	155	50	14	3	0	2

MEMBERS OF THE PERMANENT COUNCIL

President Björn Lindblom, Sweden

Secretary General Klaus Kohler, Germany

Antonina Antipova, Russia

Gunnar Fant, Sweden

Adrian Fourcin, UK

Hiroya Fujisaki, Japan

Tamaz Gamkrelidze, Georgia

Björn Granström, Sweden

Hajime Hirose, Japan

Premysl Janota, Czech Republic

Peter Ladefoged, USA

John Laver, UK

Ilse Lehiste, USA

Pierre Léon, Canada

Tatyana Nikolayeva, Russia

Louis Pols, The Netherlands

Mart Rimmel, Estonia

Jørgen Rischel, Denmark

Mario Rossi, France

Masayuki Sawashima, Japan

Kenneth Stevens, USA

Kalevi Wiik, Finland

Zong Ji Wu, P.R. China

LOCAL COORDINATORS

President	Björn Granström, KTH
Secretary general	Olle Engstrand, SU (Stockholm University)
Scientific programme	Rolf Carlson, KTH & Diana Krull, SU
Symposia	Jan Gauffin, KTH & Lennart Nord, KTH
Oral sessions	Inger Karlsson, KTH & Francisco Lacerda, SU
Poster sessions	Sheri Hunnicutt, KTH & Hartmut Traunmüller, SU
Publications	Kjell Elenius, KTH & Peter Branderud, SU
Media contacts	Björn Lindblom, SU
Equipment	Svante Granqvist, KTH & Johan Stark, SU
Exhibition	Johan Liljencrants, KTH & Rolf Lindgren, SU
Sponsors	Lennart Neovius, KTH & Bertil Lyberg, Telia Research
Economy	Viktoria Goldstein, KTH & Liisa Karhapää, SU
Local arrangements	Cathrin Dunger, KTH & Peter af Trampe, SU
Social programme	Sten Ternström, KTH & Robert McAllister, SU
Registration and information	Bibba Ejeklint, Congrex & Ulla Sundberg, SU

session		vol:page
14.4	A Dynamic Approach of Vowels Systems in Italian <i>Dolors Poch-Olivé, Bernard Harmegnies</i>	1:408
14.5	Testing the Dispersion-Focalization Theory: Phase Spaces for Vowel Systems <i>Jean-Luc Schwartz, Louis-Jean Boë, Nathalie Vallée</i>	1:412
14.6	Phonetic Evidence for the Great Mongolian Vowel Shift <i>Jan-Olof Svantesson</i>	1:416
14.7	On the Lexical Aspects of Vowel Dispersion Theory: Dutch Case <i>Louis ten Bosch</i>	1:420
14.8	Vowel Prototypes for Upsid's 33 Phonemes <i>Nathalie Vallée, Louis-Jean Boë, Yohan Payan</i>	1:424
14.9	Optimizing Articulation: the Case of Arabic Pharyngeals <i>Raquel Willerman</i>	1:428

15. The phonetics and phonology of speaking styles

15.1	The Phonetics and Phonology of Speaking Styles - an Overview <i>Klaus Kohler</i>	2:2
15.2	Phonetics and Phonology of Speaking Styles <i>William J. Barry</i>	2:4
15.3	Articulatory Reduction in Different Speaking Styles <i>Klaus Kohler</i>	2:12
15.4	From Read Speech to Real Speech <i>W. Nick Campbell</i>	2:20
15.5	Modelling Swedish Intonation for Read and Spontaneous Speech <i>Gösta Bruce</i>	2:28
15.6	Prosodic and Other Acoustic Cues to Speaking Style in Spontaneous and Read Speech. <i>Julia Hirschberg</i>	2:36

16. Phonetic explanations for sound patterns

16.1	Introduction <i>John Ohala</i>	*
16.2	The Relation Between Vowel-to-Vowel Coarticulation and Vowel Harmony in Turkish <i>Patrice S. Beddor, Handan K. Yavuz</i>	2:44
16.3	General Principles of Vocogenesis <i>Jean-Marie Hombert</i>	*
16.4	Why do Voiceless Sonorants Come and Go? <i>Jørgen Rischel</i>	*

* no written paper

session		vol:page
16.5	Phonetic Explanations for Sound Patterns: Implications for Grammars of Competence <i>John Ohala</i>	2:52
17. Physiological models of speech production		
17.1	A Model of Human Jaw and Hyoid Motion and its Implications for Speech Production <i>Rafaël Laboissière, David J. Ostry, Pascal Perrier</i>	2:60
17.2	Towards a Physiological Model of Speech Production <i>Reiner Wilhelms-Tricarico, Joseph S. Perkell</i>	2:68
17.3	Articulatory Co-Ordination and its Neurobiological Aspects: An Essay <i>Shinji Maeda, Kiyoshi Honda</i>	2:76
17.4	Intergestural Timing in Speech Production: Data and Modeling <i>Elliot Saltzman</i>	2:84
17.5	A Modeling Framework for Speech Motor Development and Kinematic Articulator Control <i>Frank H. Guenther</i>	2:92
18. The structure of intonation - linear or superpositional		
18.1	Local Shapes and Global Trends <i>Mary E. Beckman</i>	2:100
18.2	Components of a Quantitative Model of German Intonation <i>Bernd Möbius</i>	2:108
18.3	"Linear" and "Overlay" Descriptions: An Autosegmental-Metrical Middle Way <i>Robert Ladd</i>	2:116
18.4	Superposition and Subordination in Intonation. A Non-Linear Approach <i>Nina Grønnum</i>	2:124
19. Speech perception in infants		
19.1	Mechanisms of Developmental Change in Speech and Language <i>Patricia K. Kuhl</i>	2:132
19.2	The Perceptual-Magnet Effect: An Emergent Consequence of Exemplar-Based Phonetic Memory <i>Francisco Lacerda</i>	2:140
19.3	Developmental Patterns in Infant Speech Perception <i>Linda Polka</i>	2:148

session		vol:page
20. Neurophonetics		
20.1	Neurobiology of Language and Speech <i>Victoria Fromkin</i>	2:156
20.2	Roots: 5 Notes on the History of Neurolinguistics <i>Harry A. Whitaker</i>	2:164
20.3	Electrophysiological Insights Into Language and Speech Processing <i>P. Hagoort, C. M. Brown</i>	2:172
20.4	On the Neurobiology of the Sound Structure of Language: Evidence from Aphasia <i>Sheila Blumstein</i>	2:180
20.5	Phonological Structure and the Analysis of Phonemic Paraphasias <i>Mary-Louise Kean</i>	2:186
21. Vocal tract modelling for synthesis		
21.1	Cinematic Acoustic-To-Geometric Mapping <i>Jean Schoentgen, Sorin Ciocca</i>	2:194
21.2	An Object-Oriented Structure for a Speech Synthesis System <i>Corine Bickley, Eric Carlson</i>	2:198
21.3	A Model of Frication Noise Source Based on Data from Fricative Consonants in Vowel Context <i>Pierre Badin, K. Mawass, Eric Castelli</i>	2:202
21.4	Assessment Methods of Speech Synthesis Systems for Chinese <i>Jialu Zhang, Shiqian Qi, Ge Yu</i>	2:206
22. Phonology 1		
22.1	The Realization of Plosives in Nasal/Lateral Environments in Spontaneous Speech in German <i>Klaus Kohler</i>	2:210
22.2	Variation in Schwa + /r/ in German <i>William J. Barry</i>	2:214
22.3	Effects of Prosodic Constituent Length on Pause Realization <i>Ludmila Menert</i>	2:218
22.4	How Determinable are Intonation Units? <i>Anne Wichmann, Gerry Knowles</i>	2:222
23. Articulatory modelling		
23.1	Multipulse LPC Modeling of Articulatory Movements: Determination of Minimum Pulse Sequences <i>Soumya Bouabana, Shinji Maeda</i>	2:226

session		vol:page
23.2	Recovering Place of Articulation for Occlusives in VCVs <i>Gérard Bailly</i>	2:230
23.3	From Sensitivity Functions ... to Macro-Variations <i>Louis-Jean Boë, Pierre Badin, Pascal Perrier</i>	2:234
23.4	A Novel Self-Organising Speech Production System Using Pseudo- Articulators <i>Simon Blackburn, Steve J. Young</i>	2:238
24. Speech pathology and voice source models		
24.1	Irregularities in the Voice: Some Perceptual Experiments Using Synthetic Voices <i>Jan Gauffin, Svante Granqvist, Britta Hammarberg, Stellan Hertegård, Alf Håkansson</i>	2:242
24.2	Validation of Temporal & Spectral Noise Parameters Using (Re)Synthesis <i>Peter Pabon, Guus de Krom</i>	2:246
24.3	Time and Frequency Synthesis Parameters of Severely Pathological Voice Qualities <i>Abeer Alwan, Philbert Bangayan, Jody Kreiman, Christopher Long</i>	2:250
24.4	An Analysis-by-Synthesis Approach to the Estimation of Vocal Cord Nodule Features <i>Takuya Koizumi, Shuji Taniguchi, Mikio Mori, Akemi Imazawa</i>	2:254
25. Cues to segment perception		
25.1	The Role of Transition Velocity in the Perception of V1V2 Complexes <i>Pierre L. Divenyi, Björn Lindblom, René Carré</i>	2:258
25.2	Effect of Prior Knowledge of the Vowel on the Perception of French Stop Bursts <i>Linda Djezzar</i>	2:262
25.3	The Role of Consonantal Duration and Tenseness in the Perception of Voicing Distinctions of Portuguese Stops <i>João Veloso</i>	2:266
25.4	Discrimination of Coarticulated German Vowels in the Silent- Center Paradigm: "Target" Spectral Information Not Needed <i>Ocke-Schwen Bohn, Winifred Strange</i>	2:270
26. Prosodic aspects of discourse		
26.1	Prosodic Structures and Discourse Organization <i>Li-Chiung Yang</i>	2:274

session		vol:page
26.2	Modelling Intonation in Dialogue <i>Gayle M. Ayers, Gösta Bruce, Björn Granström, Kjell Gustafson, Merle Horne, David House, Paul Touati</i>	2:278
26.3	Prosodic Cues for Inferring and Realizing Discourse Relations <i>Ernst Buchberger</i>	2:282
26.4	The Function of Intonation in Spontaneous and Read Dialogue <i>Jacqueline Kowtko</i>	2:286
27. Voice correlates of age and sex		
27.1	Perceptual Characteristics of Voice Quality in Dutch Males and Females from 9 to 85 Years <i>Joséphine van Rie, Renée van Bezooijen</i>	2:290
27.2	The Influence of Smoking Habits on Perceived Age <i>Angelika Braun, Toni Rietveld</i>	2:294
27.3	Identification of Male and Female Voice Qualities in Pre-Pubescent Children <i>Kate Moore</i>	2:298
27.4	The Perception of Gender Differences in the Speech of 4 1/2-5 1/2 Year Old Children <i>Moray J. Nairn</i>	2:302
28. Speech synthesis		
28.1	An Optimised Parallel Formant Speech Synthesizer <i>Justin Andrews, K. M. Curtis</i>	2:306
28.2	A Finite Automaton Translator of Text to Phonemes for the Portuguese Language <i>Geraldo Lino de Campos, Dimas T. Chbane</i>	2:310
28.3	Neural Network Solutions for Improving English Text to Speech Transcription <i>Paul R Gubbins, K. M. Curtis</i>	2:314
28.4	Transcribing Names with Foreign Origin in the Onomastica Project <i>Joakim Gustafson</i>	2:318
28.5	The Delta System with Syllt: Increased Capabilities for Teaching and Research in Phonetics <i>Susan R. Hertz, Elizabeth C. Zsiga</i>	2:322
28.6	An Integrated Phonological-Phonetic Model for Text-To-Speech Synthesis <i>Jill House, Sarah Hawkins</i>	2:326

session		vol:page
28.7	Generating Prosodic Structure for Restricted and "Unrestricted" Texts <i>Anders Lindström, Merle Horne, Tomas Svensson, Mats Ljungqvist, Marcus Filipsson</i>	2:330
28.8	High Intelligibility and Naturalness Chinese TTS System and Prosodic Rules <i>Chu Min, Lu Shinan</i>	2:334
28.9	Articulatory Synthesis Using a Stochastic Target Model of Speech Production <i>Gordon Ramsay, Li Deng</i>	2:338
28.10	Phonetic Realisation of Prosodic Boundaries in Synthetic Speech <i>Angelién A. Sanderman</i>	2:342
28.11	LACS: Label Assisted Copy Synthesis <i>Michel Scheffers, Adrian Simpson</i>	2:346
28.12	A Tool for the Complete Production of Copy Syntheses from Natural Tokens <i>Andrew Simpson</i>	2:350
28.13	On the Development of Text to Speech System for Hindi <i>Rajesh Verma, A. Sada Siva Sarma, Nisheeth Shrotriya, Anil Kumar Sharma, S. S. Agrawal</i>	2:354
28.14	Phonetically Sufficient Allophonic Database for Concatenation Synthesis of Russian Speech <i>Nina V. Zinovieva</i>	2:358
29. Intonation and tone		
29.1	Multilinear Model of French Prosody Implemented on a Text-To-Speech System <i>Susan Barber, Daniel Hirst, Jill House, Pascale Nicolas, Pascal Roméas, Bengt Waernulf</i>	2:362
29.2	Tonal Correlates of Discourse Structure <i>Antonis Botinis</i>	2:366
29.3	Prosodic Markers at Syntactic Boundaries in Spanish <i>Juan M. Garrido, Joaquim Llisterri, Rafael Marin, Carme de la Mota, Antonio Ríos</i>	2:370
29.4	Declination in Dutch and Danish: Global Versus Local Pitch Movements in the Perceptual Characterisation of Sentence Types <i>Charlotte Gooskens, Vincent J. van Heuven</i>	2:374
29.5	Parametric Description of F0-Contours in a Prosodic Database <i>Barbara Heuft, Thomas Portele, Florian Höfer, Jürgen Krämer, Horst Meyer, Monika Rauth, G. Sonntag</i>	2:378

session		vol:page
29.6	Comparison of Prosodic Characteristics in English, Finnish and German Radio and TV Newscasts <i>Antti Iivonen, T. Niemi, M. Paananen</i>	2:382
29.7	Modelling Intra- and Inter-Speaker Pitch Range Variation <i>Robert Ladd, Jacques Terken</i>	2:386
29.8	Implementing a Floating Tone <i>Yetunde Laniran</i>	2:390
29.9	Vowel Intrinsic Pitch in Quebec French: Measuring IF0 in Connected Speech <i>Julie Lavoie, Conrad Ouelton</i>	2:394
29.10	Towards an Intono-Discursive Segmentation of Spontaneous Utterance in French <i>C. Leleu, Anne Lacheret-Dujour, M-A. Morel</i>	2:398
29.11	A Contrastive Study of the Intonation Patterns of Chinese, Malay and Indian Singapore English <i>Lisa Lim</i>	2:402
29.12	Pitch Patterns and Duration: Analysis and Synthesis <i>Sandra Madureira, Cairo Humerto da Silva, Patricia A. de Aquino</i>	2:406
29.13	Production and Perception of Statement, Question and Non-Terminal Intonation in German <i>Hansjörg Mixdorff, Hiroya Fujisaki</i>	2:410
29.14	Bedouin Arabic Intonation Patterns in Support of the Superpositional Approach to Intonation <i>Judith Rosenhouse</i>	2:414
30. Speech production		
30.1	Spatiotemporal Stability on the Tongue-Jaw and Lip-Jaw Complex: Comparisons Across Sessions. <i>Peter J. Alfonso</i>	2:418
30.2	Comparing Methods for Quantifying the Voice Source of Different Phonation Types Inverse Filtered from Acoustic Speech Signals <i>Paavo Alku, Erkki Vilkmán</i>	2:422
30.3	Speech Maps Interactive Plant "SMIP" <i>Louis-Jean Boë, Bernard Gabioud, Pascal Perrier</i>	2:426
30.4	Interaction Between Glottal and Vocal-Tract Aerodynamics in a Comprehensive Model of the Speech Apparatus <i>Paul Boersma</i>	2:430
30.5	Asynchrony Measure of Lip-Tongue-Jaw Movements <i>Hans-Heinrich Bothe, Christine Mooshammer, S. Kuhrt, Bernd Pampino-Marschall</i>	2:434

session		vol:page
30.6	Articulatory Characteristics of Single and Blended Lingual Gestures <i>Dani Byrd</i>	2:438
30.7	Patterns of Lingual Variability in German Vowel Production <i>Philip Hoole, Barbara Kühnert</i>	2:442
30.8	A Gestural Production Model Built by Acoustic-Articulatory Inversion of Formant Trajectories <i>Paul Jospa, Martine George, Alain Soquet</i>	2:446
30.9	New Techniques of Vocal Tract Modeling for Articulatory Speech Synthesis <i>Matti Karjalainen, Vesa Välimäki</i>	2:450
30.10	An Acoustic Analysis of the Retroflex Flap <i>Knut Kvale, Arne Kjell Foldvik</i>	2:454
30.11	The Groove Production of Swedish Sibilants - an EPG Analysis <i>Per Lindblad, Sture Lundqvist</i>	2:458
30.12	Equilibrium Point Hypothesis and Articulatory Targets in Speech: a Description from Simulations of Empirical Data Using a Biomechanical Model of the Jaw <i>Hélène Loevenbruck, Pascal Perrier, David J. Ostry</i>	2:462
30.13	Acoustic Model for an Articulatory-Formant Speech Synthesizer <i>Alexander G. Miller, V. Sorokin</i>	2:466
30.14	The Articulatory Correlates of Descriptive Categories for Supralaryngeal Voice Qualities <i>Francis Nolan, Barbara Kühnert</i>	2:470
30.15	Simulation of Tongue Shape Variations in the Sagittal Plane Based on a Control by the Equilibrium-Point Hypothesis <i>Yohan Payan, Pascal Perrier, Rafaël Laboissière</i>	2:474
30.16	Modal Analysis of Acoustic Wave Propagation in the Vocal Tract Using a Finite-Difference Simulation <i>Gordon Ramsay, Li Deng</i>	2:478
30.17	Analysis and Articulatory Synthesis of Different Voicing Types <i>Celia Scully, K. Stromberg, David Horton, Peter Monahan, Ailbhe Ni Chasaide, Christer Gobl</i>	2:482
30.18	A Regression Analysis of the Relation Between Physiological Signals and F0 <i>Helmer Strik</i>	2:486
30.19	Tongue Structural Model: Integrating MRI Data and Anatomical Structure into a Finite Element Model of the Tongue <i>Chao-Min Wu, Reiner Wilhelms-Tricarico</i>	2:490

session		vol:page
31. Perception		
31.1	Hemispheric Contributions to Processing Affective and Linguistic Prosody	2:494
	<i>Tatiana Chernigovskaya, Natalia D. Svetozarova, Tatiana Tokareva</i>	
31.2	Perception of Hesitations in Spontaneous French Speech	2:498
	<i>Danielle Duez</i>	
31.3	Cue Interaction in the Perception of Intervocalic and Syllable-Initial Voiceless Fricative/Affricate Contrasts	2:502
	<i>Andrew Faulkner, Stuart Rosen, A. M. Darling, Mark Huckvale</i>	
31.4	Individual Variability in the Perceptual Weighting of Cues to Stop Place and Voicing Contrasts	2:506
	<i>Valerie Hazan, B. Shi</i>	
31.5	On the Influence of the Internal Structure of a Syllable on the P-Center-Perception	2:510
	<i>Peter M. Janker</i>	
31.6	Integrating Voice Quality and Tongue Root Position in Perceiving Vowels	2:514
	<i>John Kingston, Laura J. Walsh, Rachel Thorburn, Christine Bartels</i>	
31.7	The Illusion of Perceptual Restoration of Missing Phoneme in Children.	2:518
	<i>Inna V. Korolyova, G. G. Shurgaya</i>	
31.8	General Auditory Processes may Account for the Effect of Preceding Liquid on Perception of Place of Articulation	2:522
	<i>Andrew Lotto, Keith R. Kluender</i>	
31.9	Perceptual Mapping and Vowel Normalisation	2:526
	<i>Robert H. Mammell</i>	
31.10	Contextual and Lexical Effects in the Identification of Fricatives	2:530
	<i>Noël Nguyen</i>	
31.11	Do Tongue Twisters Occur Naturally?	2:534
	<i>Mary O'Kane, P.E. Kenne, H. Pearcy</i>	
31.12	Rate-Dependent Perception of VOT: Auditory Contrast or Rate Normalisation	2:538
	<i>Jörgen Pind</i>	
31.13	Neural Mechanisms in Perception of Sounds with Different Time Parameters	2:542
	<i>Elena A. Radionova</i>	
31.14	The Temporary Energy Distribution Model (TED) of Pitch Perception	2:546
	<i>Henning Reetz</i>	

session		vol:page
31.15	Word Intelligibility and Place Assimilation in Spontaneous Speech	2:550
	<i>Catherine Sotillo, J. McAllister, E. G. Bard, G. Doherty-Sneddon, A. Newlands</i>	
31.16	Some Effects of Extra- and Paralinguistic Variation on the Phonetic Quality of Vowels	2:554
	<i>Hartmut Traunmüller</i>	
31.17	Physiological Correlates of Speech-Hearing Interaction	2:558
	<i>Inna Vartanian</i>	
31.18	Detecting Ghost Phoneme: the "Liaison Enchaînée" in French	2:562
	<i>Sophie Wauquier-Gravelines</i>	
31.19	The Acoustic Characteristics of Whispered Plosives and their Reliability for the Perception of "Voicing"	2:566
	<i>Sandra P. Whiteside, Kevin L. Baker</i>	
31.20	Perception of Oral Release Rate for Initial Voiced Stops	2:570
	<i>David R. Williams</i>	
32. Consonant types and clusters		
32.1	Click Articulations in Xhosa: New Perspectives through Wigner Distribution Analysis	2:574
	<i>Justus Roux, Grzegorz Dogil, Wolfgang Wokurek</i>	
32.2	Labial-Velar Stops in Dagbani	2:578
	<i>Massimo Pettorino, Antonella Giannini</i>	
32.3	An Emma Investigation of Lingual Assimilation and Coarticulation in a Selected Set of Catalan Consonant Clusters	2:582
	<i>Daniel Recasens</i>	
32.4	Pharyngeal and Uvular Consonants are Approximants: an Acoustic Modeling Study	2:586
	<i>Mohamed Yeou, Shinji Maeda</i>	
32.5	The Influence of Slowed Speech Rate on Coarticulation: Acoustic Analysis of Durational and Spectral Parameters	2:590
	<i>Ingo Hertrich, Hermann Ackermann</i>	
32.6	The Influence of the Syllable Boundary on Consonant-Consonant Realizations	2:594
	<i>Thomas Portele</i>	
33. Phonology 2		
33.1	On the Status of the Segment in Four Typologically Diverse Languages: Results from Global Sound Similarity Judgments	2:598
	<i>Bruce L. Derwing, Terrance M. Nearey</i>	
33.2	Syllable Saliency in the Perception of Korean Words	2:602
	<i>Yeo Bom Yoon, Bruce L. Derwing</i>	

session	Table of Contents - ICPHS 95 - Stockholm	vol:page
33.3	Spelling Errors and Phonological Levels of Specification <i>Richard Lilly</i>	2:606
33.4	Learning of a Phonological Component from BREF Corpus <i>Alix Mailland, Martine de Calmès, Guy Pérennou</i>	2:610
33.5	Vowel Inventories and Vowel Processes within Optimality Theory <i>Abigail Kaun</i>	2:614
33.6	A Minimalist Approach to Phonology <i>David Michaels</i>	2:618
34. The voice source		
34.1	The Voice Source in Prosody <i>Gunnar Fant, Anita Kruckenberg</i>	2:622
34.2	Glottal Leakage Studied by Means of Simultaneous Video-Stroboscopy and Flow Measurement <i>Bert Cranen, F. de Jong</i>	2:626
34.3	Supralaryngeal Resonance and Glottal Pulse Shape as Correlates of Stress and Accent in English <i>Agaath M. C. Sluijter, Stefanie Shattuck-Hufnagel, Kenneth N. Stevens, Vincent J. van Heuven</i>	2:630
34.4	Interactive Voice Source Modelling <i>Mats Båvegård, Gunnar Fant</i>	2:634
34.5	Physiological Correlates of Global and Local Pitch Range Variation in the Production of High Tones in English <i>Mary E. Beckman, Donna Erickson, Kiyoshi Honda, Hiroyuki Hirai, Seiji Niimi</i>	2:638
34.6	The Prosodic Variability of Speech in a Noisy Context <i>Noureddine Kadiri, Nadine Vigouroux, Guy Pérennou</i>	2:642
35. Peripheral mechanisms and pathological speech		
35.1	Speech Deficiencies in Primary Schoolers with Down Syndrome <i>Irène Johansson</i>	2:646
35.2	Are Phonologic Problems Predictable from Pre-speech Vocalisation in Children Born with Cleft Palate? <i>Birgit Hutters, Anja Bau, Kirsten Brøndsted</i>	2:650
35.3	Articulatory/Acoustic Relationships in Lateralised Productions of Sibilant Fricatives <i>Hilary Dent, Fiona Gibbon, William J. Hardcastle, M. Wakumoto</i>	2:654
35.4	Tongue Movements in Maloccluded Subjects <i>Antonella Giannini, Massimo Pettorino, Germano Savastano, Carmelo Cimmino, Giusi Della Pietra</i>	2:658

session	Table of Contents - ICPHS 95 - Stockholm	vol:page
35.5	Foreign Accent Syndrome: an Italian Case Study <i>G. Denes, John Trumper, M. Maddalon, L. Romito</i>	2:662
36. Vowels and syllables		
36.1	Perception of Formant Transitions in Synthesised Vowel Pairs <i>William A. Ainsworth</i>	2:666
36.2	A Perceptual Study of Reduced Vowels in Clear and Casual Speech <i>S.-J. Moon, Björn Lindblom, J. Lame</i>	2:670
36.3	Implicit Memory for Silent-Center Syllables <i>Susan L. Hura</i>	2:674
36.4	Evidence for the Perceptual Relevance of Vowel-Inherent Spectral Change for Front Vowels in Canadian English <i>Terrance M. Nearey</i>	2:678
36.5	Effects of Formant Frequency Modulation on Vowel Identification <i>Peter J. Bailey, Kim Bevan, Tracy Burr</i>	2:682
36.6	Moraic Status and Syllable Structure in Speech Perception <i>Takashi Otake, Kiyoko Yoneyama</i>	2:686
37. Child language development 2		
37.1	Acquisition of Listing Intonation in English Children <i>Louise H. Coward</i>	2:690
37.2	On Variation in Early Speech Production <i>Britt Krüger</i>	2:694
37.3	Articulatory Patterns in Early Speech Production <i>Thorsten Piske</i>	2:698
37.4	An Investigation of Rhythmic Processes in English-Speaking Children's Word Productions <i>Margaret M. Kehoe, Carol Stoel-Gammon</i>	2:702
37.5	Consonant Clusters in Disordered L1 Acquisition: a Longitudinal Acoustic Study <i>James M. Scoobie, William J. Hardcastle, Paul Fletcher, Fiona Gibbon</i>	2:706
37.6	The Effect of Bilingualism on the Acquisition of Perceptual Categories Underlying the Voicing Contrast <i>Ian Watson</i>	2:710
38. Prosodic phrasing		
38.1	The Prosodic Structure of Left-Detached Phrases in French Interrogative Utterances <i>Frédéric Sabio, Albert Di Cristo, Daniel Hirst</i>	2:714

session		vol:page
38.2	Prosodic Features of Finality for Intonation Units in French Discourse <i>Magali Vincent, Albert Di Cristo, Daniel Hirst</i>	2:718
38.3	The Accentual Phrase and the Prosodic Structure of French <i>Sun-Ah Jun, Cécile Fougeron</i>	2:722
38.4	Predictability of Different Attitudinal Intonation in Standard Chinese <i>Zong-Ji Wu</i>	2:726
38.5	Effects of Phrasal Length and Time Distance between Peaks on Peak Height in Mexican Spanish <i>Pilar Prieto, Holly Nibert, Chilin Shih</i>	2:730
38.6	A Long-Distance Dependency in Yorùbá Tone Realization <i>Yetunde Laniran, G. Nick Clements</i>	2:734
39. Paralinguistic aspects of vowels and voice		
39.1	Speaker and Listener Sex for Speaker Height and Weight Identification <i>Wim van Dommelen</i>	2:738
39.2	Speaker Characteristics in the Coarticulation of Three Dutch Vowels /a, i, u/ <i>Henk van den Heuvel, Bert Cranen, Toni Rietveld</i>	2:742
39.3	Relationship Between Gestures and Voice in Verbal Interaction: Prosodic and Kinesic Aspects of Back-Channel Signals <i>Serge Santi, R. Bertrand, J. Boyer, C. Cavé, Isabelle Guaitella</i>	2:746
39.4	Characterization of the Non-Linguistic Information of Vowels by Matching Vowel Systems <i>Jean-Sylvain Lienard, Maria-Gabriella Di Benedetto</i>	2:750
39.5	Speech Pattern Processing: Integrating the Linguistic and Non-Linguistic Aspects of Voice and Speech <i>Jean-Sylvain Lienard</i>	2:754
39.6	Inter-Judge Variability in Perception of Voice Qualities <i>Fred D. Minifie, Jordan Green, J. Smith, Daniel Z. Huang</i>	2:758
40. Dynamic, non-segmental approaches to phonetics		
40.1	Making Sense of Dynamic, Non-Segmental Phonetics <i>John Local</i>	3:2
40.2	Prosodic Organization of Speech Based on Syllables: The C/D Model <i>Osamu Fujimura</i>	3:10
40.3	Arguments for a Nonsegmental View of Speech Perception <i>Sarah Hawkins</i>	3:18

session		vol:page
40.4	Segmental Phonology and Non-Segmental Phonetics <i>Patricia A. Keating</i>	3:26
41. Auditory basis of speech perception		
41.1	The Ears have it: The Auditory Basis of Speech Processing <i>Steven Greenberg</i>	3:34
41.2	Psychophysics of Speech Engineering Systems <i>Hynek Hermansky, M. Pavel</i>	3:42
41.3	A Computational Approach to Recognition of Speech Features Using Models of Auditory Signal Processing <i>Thomas Holton</i>	3:50
41.4	Cortical Representation of the Acoustic Spectrum <i>Shihab A. Shamma</i>	3:58
42. Constraint-based approaches to phonology		
42.1	Constrained-Based Approaches to Phonology <i>G. Nick Clements</i>	3:66
42.2	English Linking [r] - Constraints, Principles and Parameters or Rules? <i>Jacques Durand</i>	*
42.3	Laryngeal Features in German - Phonological Constraints and Phonetic Realizations. <i>Michael Jessen</i>	*
42.4	Native and Loanword Phonology as One: Constraints vs. Rules <i>Carole Paradis</i>	3:74
43. The voice in speech and singing		
43.1	The Voice Source. Models and Performance <i>Gunnar Fant</i>	3:82
43.2	How Emotion is Expressed in Speech and Singing <i>Klaus Scherer</i>	3:90
43.3	Subglottal Pressure Behavior in Singing and Speech <i>Johan Sundberg</i>	3:98
44. Multi-modal speech perception		
44.1	Modeling the Perception of Bimodal Speech <i>Dominic W. Massaro, Michael M. Cohen</i>	3:106
44.2	Auditory, Visual and Audiovisual Vowel Representations: Experiments and Modelling <i>Jordi Robert-Bibes, Jean-Luc Schwartz, Pierre Escudier</i>	3:114
